Allowable Subject Matter

Claims 1-13 are allowed.

The instant invention in its various embodiments includes at least an oxygen probe with internal resistance, phase shifter or shifting, oscillator producing alternating current provided to probe and phase shifter, voltage divider or voltage dividing supplying a voltage through the probe internal resistance, capacitor or combining the divided voltages, amplifier or amplifying and a rectifier or rectifying the amplified signal.

The prior art does not disclose or suggest these elements in the particular configurations as claimed.

The device and method may be used to supply the probe heater with a voltage that is advantageously amplified when a particular probe internal resistance is achieved.

The additional references cited on the accompanying form PTO-892 though not cited above are provided to indicate other prior art gas sensors that include one or more features or limitations in common with the instant invention.
